Luthfi Musthafa

Software Engineer | Web Applications & Cross-Platform Integration

Jakarta, Indonesia · luthfi.musthafa@gmail.com
https://github.com/lutfim22 · https://www.linkedin.com/in/lutfi22

Professional Summary

Software Engineer with 7+ years of professional experience specializing in web application engineering, cross-platform integration, and delivering complex product experiences. Experienced in building web-based applications that integrate with native Android, iOS, and Tizen environments, with a focus on reliable architecture, maintainability, accessibility, and user experience.

At Samsung Research & Development Indonesia, contributed to the development of several SmartThings plugins, including Family Care, Air Care, and Virtual Home. Served as Tech Lead on selected projects, taking ownership of technical decisions, coordinating engineers, reviewing implementations, and supporting delivery across multiple development milestones.

Brings a combination of hands-on engineering, cross-functional collaboration, and technical leadership to solving complex product challenges. Experienced in translating product requirements into practical engineering solutions, navigating platform-specific constraints, and improving development quality through structured workflows and collaborative problem-solving.

Focused on transforming complex product needs into reliable, maintainable, and user-centered web experiences.

Work Experience

Engineer, Web Application (Software Engineer) — Samsung Research & Development Indonesia (SRIN)

Jakarta, Indonesia | 2019 – Present

- Served as Tech Lead for SmartThings Family Care for iOS, combining hands-on development of onboarding and location features with technical coordination, code reviews, and on-schedule delivery of two major releases.
- Developed cross-platform web experiences for SmartThings Virtual Home across mobile, Family Hub, and TV, adapting connected-device simulation and user interactions to platform-specific capabilities and navigation requirements.
- Developed SmartThings Air Care features integrating air-quality data, APIs, and connected IoT devices to support environmental monitoring and device control through web-based interfaces.
- Contributed to the development and validation of a cross-platform JavaScript-to-native integration layer, supporting communication between web applications and native capabilities across Android, iOS, and Tizen environments.
- Improved engineering quality and delivery consistency through code reviews, technical problem-solving, cross-functional collaboration, and contributions to maintainable web application implementations.
- Contributed to shared UI frameworks and reusable components, improving consistency, maintainability, and accessibility across application interfaces.

Technical Skills

Programming Languages: JavaScript, TypeScript

Frontend & UI: React, Next.js, LitElement, Web Components, HTML/CSS, Tailwind CSS, Accessibility

Cross-Platform Integration: WebView Integration, JavaScript–Native Bridge, REST API Integration

State & Data: Redux / Redux Toolkit, Asynchronous State Management

Testing & Tooling: Jest, Git & GitHub, GitHub Actions, Webpack, Vite, ESLint / Stylelint

Selected Projects

SmartThings Family Care for iOS

A family-care experience enabling connected monitoring, location awareness, and activity insights through a web-based interface integrated with a native iOS application.

Tech Stack: TypeScript · LitElement · Redux Toolkit · WebView · REST APIs

SmartThings Virtual Home

A cross-platform experience for simulating connected smart-home devices and interactions across mobile, Family Hub, and TV environments.

Tech Stack: JavaScript · TypeScript · React · LitElement · Web Components · WebView

SmartThings Air Care

An IoT-enabled air-quality management experience integrating environmental data, APIs, and connected devices to support air-quality monitoring and device control.

Tech Stack: JavaScript · TypeScript · LitElement · REST APIs · IoT Integration · Chart.js

Research Experience

National Taiwan University of Science and Technology (NTUST) — Research Internship | 2018

Conducted research on power-saving mechanisms and deep-sleep behavior in Narrowband IoT (NB-IoT) systems during a research internship at National Taiwan University of Science and Technology (2018).

Education

Universitas Indonesia — Bachelor of Engineering in Computer Engineering
2015 – 2019 | Indonesia

Spoken Languages

Indonesian — Native

English — Professional Working Proficiency
